DETAILED ACTION

Restriction

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted:

Group I, claims 1-43, drawn to a pharmaceutical composition comprising PTH.

Group II, claims 50-51, drawn to a method for administering active substances to a small intestine or colon comprising administering a pharmaceutical composition comprising PTH.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The common technical feature of the above groups is the pharmaceutical composition of claim 1. Claim 1 defines a composition comprising PTH by means of the *in vitro* release of PTH when tested in a dissolution test of pharmacopoeia standard. This definition is unclear as it fails to define which specific test is to be used and the relevant test conditions (temperature, dissolution medium, paddle speed, etc). EP 943336 discloses enteric-coated capsules comprising PTH and a polyvalent metal carrier compound, e.g. a calcium compound such as calcium carbonate (paragraphs 9, 10 and 50; test examples 3 and 5, and powder composition 2; claims). Given the lack

of clarity of claim 1, the composition of EP 943336 is considered to break the novelty of claim 1 and accordingly break unity of invention. In other words, the pharmaceutical composition of claim 1 is the common technical feature of Group I and II but it is not a special technical feature under PCT Rule 13.2 because it is not novel. Since Applicant's inventions do not contribute a special technical feature when viewed over the prior art they do not have a single general inventive concept and so lack unity of invention.

Rejoinder

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not

commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Inventorship Notice

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
